 TI - Stand for musical wind instrument with bell, particularly trumpet, comprises support with shape matching extensively instrument bell externally and internally, over which ball can be placed  
 AB - The stand is particularly for a bell of a trumpet and comprises a support (1), the shape of which matches extensively the bell of the instrument, both externally and internally. The bell can be placed over the support. In the lower part of the support a socket (4) with an inner thread (8) and a holder (9) with an outer thread (10) is fixed. The holder can be screwed into the socket. The holder has a hood (19) which has a coaxial pin (20) and slots (15) in the wall of the hood continue into the pin. A one-piece closure member (27) is provided, which has a plate (28) to which feet (12) closure parts stand vertically. The closure member is connected in positive engagement with the holder.

 TI - Stand for musical wind instrument with bell, particularly trumpet, comprises support with shape matching extensively instrument bell externally and internally, over which ball can be placed  
 AB - DE19851935 NOVELTY - The stand is particularly for a bell of a trumpet and comprises a support (1), the shape of which matches extensively the bell of the instrument, both externally and internally. The bell can be placed over the support. In the lower part of the support a socket (4) with an inner thread (8) and a holder (9) with an outer thread (10) is fixed. The holder can be screwed into the socket.  
 - DETAILED DESCRIPTION - The holder has a hood (19) which has a coaxial pin (20) and slots (15) in the wall of the hood continue into the pin. A one-piece closure member (27) is provided, which has a plate (28) to which feet (12) closure parts stand vertically. The closure member is connected in positive engagement with the holder.  
 - USE - As a stand is easy to produce.  
 - DESCRIPTION OF DRAWING(S) - The figure presents an axial section of the stand, with feet upwardly pivoted into the support, only one foot being shown for the sake of simplification.
